

Pinpoint Saves Fortune 100 Consulting Firm more than \$100,000 in Defensible Data Collection Project

Description

(Murray, Nebraska) MAY 04, 2016

The Fortune 100 Manufacturer of construction and mining equipment, diesel and natural gas engines, and industrial gas turbines, has saved thousands of dollars when defensibly copying and filtering data.

For one particular situation, the global company had one license to collect and process data from a subsidiary in Ireland. Harvester Portable easily saved the company well over \$100,000. As a result, the organization consequently placed an order for Harvester Server.

The case study describes several challenges that the large consulting firm faced and how the firm was able to lower production costs and increase time efficiency when faced with several legal matters were faced.

“The lightweight design of the tools, can be used in any type of infrastructure, which proved to be very beneficial for a global enterprise such as ourselves. The extreme bandwidth issues experienced across the globe with competing software programs, have been solved with Harvester.” Steve, Contractor for Peoria, Ill.- based Fortune 100 manufacturer
