

HARVESTER 6: EXPORT COLLECTIONS TO RELATIVITY AND MORE

Description

Merge Harvester E-Discovery collections into a central review database with just a few clicks!

This is the 4th of 8 sneak peeks into the features in our upcoming Harvester 6.0 release.

SNEAK PEEK #4 – MERGE, PROCESS, OCR AND REVIEW

When self-collection kits are received, wouldn't it be great if all the data could easily be combined into one review database? Would you like to generate custodian, project, and global deduplication reports across all your collections?

QUICK AND EASY FIRST PASS REVIEW

Harvester Serverâ€™s Merge and Process tool combines all your individual Harvester Portable and Server collections. Once the data is merged itâ€™s easy to begin your privilege review and quickly find responsive items within Harvester Server.

QUEUE MULTIPLE COLLECTION JOBS AT ONCE

The screenshot shows the 'Harvester Server Processing' window. At the top, there's a 'Post Process Jobs' tab. Below it are dropdowns for 'Project', 'Job', and 'Review Location', followed by an 'Add' button. A table lists several collection jobs with columns for Database Location, Export Location, Project Name, Export Name, and Review Database Name. The last row is selected. Below the table are input fields for 'Data Prefix' (ACMED), 'Zero Padding' (8), 'Files Per Folder' (100), 'Threads to Use' (8), 'Data Description' (ACME REMOTE COLLECTIONS), and 'Process Note'. To the right are checkboxes for 'Optical Character Recognition' (checked), 'Text in LoadFile' (unchecked), 'Copy All Files' (checked), 'Compress Final Export' (unchecked), 'Delete Uncompressed Export' (unchecked), 'Silent Mode' (unchecked), and 'Continue Job Queue' (checked). A 'Save Default Settings' button is at the bottom left. At the bottom right, there's a 'Launch Options' dropdown set to 'Queue and Start Proc...', a 'Review Location' dropdown, and a 'Launch' button.

The Merge and Process utility not only combines all collections into a central SQL Server review database. It also uses our [fast multi-threaded processing engine to extract text, OCR images](#), create full-text indexes, and have custodian data ready for review. Users can create load files and import the processed data into popular review platforms.

DITCH THE DONGLES

Use a tool that lets you easily share licenses between multiple locations. [Pinpoint Labs](#) E-Discovery collection, processing and review tools can be ran from a Server, NAS, client computer or even a USB

drive! No more waiting for new hardware resources to be added to your environment, get up and running with your local machine, then scale up to an enterprise platform.
