

HaystackID's John Wilson Leverages Harvester Capabilities for Data-Intensive eDiscovery in 49 Countries

Description

Read this eDiscovery collection case study to learn how [HaystackID](#) utilized Harvester to:

- The ability of a software solution to script a profile and modify to run 30 to 40 collections was an absolute necessity
- Feature up to 38 terabytes per hour of data assessment snapshots
- Keyword search loose files PSTs, OSTs, and archives, and remain GDPR compliant
- Create a hard drive that we can ship out, remote into that system, and run Harvester

HaystackID continues to be a proud supporter and user of Pinpoint Labs' products. Wilson summarizes the relationship best by stating, "I love supporting Pinpoint Labs. It's earned that love. You've delivered a great product that does great work."
