Pinpoint Labs Unveils SharePoint Collector v6, A Streamlined Solution for Efficient Data Collection

Description

Major product update integrates with Microsoft Graph API and new Graph API filtering for improved performance and control.

Plattsmouth, NEâ??March 7th, 2023â??Pinpoint Labs, a leading forensic software and litigation support firm, has announced the release of SharePoint Collector v6, the latest version of its industry-leading collection tool for SharePoint data. The new version of SharePoint Collector includes numerous enhancements, including:

- Microsoft Graph API integration
- Graph API filtering
- New application launcher
- Updated interface
- Enhanced collection job scheduling and workflow automation

SharePoint Collector v6 offers a simplified, streamlined solution for accessing and collecting legacy on-premises SharePoint data, services, and the latest Office 365 SharePoint site content. The new application launcher auto-selects the WSS or Graph API version needed. The integration of Microsoft Graph API ensures improved performance and reliability. At the same time, the new Graph API filtering features provide more control and flexibility over data collection.

> â??We are proud to unleash the power of SharePoint Collector v6, delivering the pinnacle of SharePoint data collection technology,â?• declared Jon Rowe, CEO of Pinpoint Labs. â??Our cutting-edge integration of the Microsoft Graph API and advanced filtering capabilities make SharePoint Collector v6 an essential instrument for legal and forensic IT professionals, enabling them to unlock the full potential of their data and achieve unparalleled insights.â?•

The updated interface in SharePoint Collector v6 offers a more intuitive and user-friendly experience, making it easier for users to manage their data collection tasks. The new interface elements provide a smoother and more seamless experience, ensuring that SharePoint Collector remains a powerful and efficient solution for accessing SharePoint data.

The enhanced collection job scheduling and workflow automation features in SharePoint Collector v6 make it easier for users to automate the collection and processing of SharePoint data, reducing the time and effort required for manual data collection.

> â??We at Pinpoint Labs are unwavering in our commitment to equip our customers with unparalleled digital forensics and eDiscovery solutions,â?• declared Rowe. â??The launch of SharePoint Collector v6 marks a significant milestone in pursuing this objective. We are thrilled to witness the transformative effect it will undoubtedly have on the industry.â?•

Pinpoint Labs will be attending Legalweek on March 20 â?? 23, 2023. To meet with the team during Legalweek and see a demo, attendees can schedule a meeting.

About Pinpoint Labs

Pinpoint Labs, the global enterprise software company, provides an industry-leading collection, processing, and review technology platform. Pinpoint offers on-premises and cloud-based solutions that get forensic and eDiscovery professionals on the fastest and most efficient path to discovery. Pinpoint lets developers focus on what they do best: build software that helps legal teams while giving peace of mind to management with robust controls, tools, and reports.

Pinpoint was founded over 16 years ago by computer forensic examiners Jon Rowe and James Beasley. Their experience includes over 30 years of litigation support and over two decades in software development.
