

Revolutionizing Mobile Data Collection with CrossCopy Mobile

Description

For nearly two decades, weâ??ve been at the forefront of innovation in eDiscovery and investigations, constantly listening to our clientsâ?? needs. One message has been clear: how we work is evolving, and so is how we handle mobile data. Organizations face growing challenges with mobile data investigations and need better tools to address them. Today, weâ??re thrilled to announce the launch of our most groundbreaking feature yet**: CrossCopy Mobile**.

This isnâ??t just a product launch; itâ??s a transformation in how organizations collect, manage, and protect mobile data. Mobile devices have become critical in todayâ??s workflows, but collecting sensitive data from them has traditionally been cumbersome. Think hardware kits, on-site visits, and complex processes. CrossCopy Mobile is here to replace all of that with a simple, equipment-free solution that prioritizes security, transparency, and efficiency.

Instead of relying on physical devices, administrators can now assign collection tasks remotely using secure URLs. Custodians are empowered to review their data before transferring it, ensuring full transparency while safeguarding sensitive information. No hardware, no unnecessary frictionâ??just a streamlined, secure workflow.

â??Organizations are relying on mobile devices more than ever, which makes secure, streamlined mobile data collection an essential need,â?• says Jon Rowe, CEO of Pinpoint Labs. â??CrossCopy Mobile delivers exactly that, empowering teams to tackle complex data challenges without compromising user privacy.â?•

Some of our early adopters have already shared fantastic feedback. One client noted, â??Wowâ??this is the best tool weâ??ve seen yet for mobile data collection. Itâ??s intuitive, secure, and has completely transformed how we handle investigations.â?• Another shared, â??The ease of use for both administrators and custodians is unmatchedâ??what used to take days now takes just hours.â?• These insights reinforce how CrossCopy Mobile is making an immediate impact.

The features of CrossCopy Mobile reflect our commitment to solving real-world challenges. With encrypted, equipment-free workflows, direct storage integration (AWS, SFTP, Azure), and built-in chain-of-custody tracking, the tool makes compliance and efficiency go hand in hand. Itâ??s also incredibly user-friendly, so teams can focus on what matters most without workflow disruptions.

Weâ??re excited to show you exactly how CrossCopy Mobile works in our upcoming **30-minute webinar on January 30, 2025, at 12:00 PM CST.** In this live demonstration, weâ??ll walk you through its capabilities and share insights into how it can enhance your workflows. **Register here** to secure your spot today.

For more details, you can also read our **official press release**, which dives deeper into the toolâ??s features and impact.

With CrossCopy Mobile, the future of mobile data collection has arrived. Itâ??s secure, seamless, and built for the demands of todayâ??s fast-paced world. Ready to take the leap? **Schedule a demo today** and discover how this innovative tool can revolutionize your workflows.
