

SharePoint E-Discovery collections webinar

Description

SharePoint Collector (SPC) allows users to easily identify and defensibly collect E-Discovery files and lists from local or remote SharePoint sites.

We invite you to join us for a webinar highlighting:

- What to expect when collecting from SharePoint sites
- Common obstacles related to lists items and attachments
- Installing SPC on an external hard drive or host computer
- Configuring login options
- How to collect from sites in the cloud
- Preparing SharePoint files, items and metadata for attorney review

CLIENT TESTIMONIAL

“I just wanted to write and let you know how much we appreciate the support your team provided, and how well SharePoint Collector worked on a recent project. We were tasked with what became a very large project (650+ million records) and SharePoint Collector got us through. It was also very helpful we were able to manage the job remotely, due to the size and time required. We are big fans and glad to know we have a tool that will assist us in future SharePoint collections as well as a support team that bends over backwards to assist!”
