

Harvester: An Essential e-Discovery Tool for Idaho's Largest Healthcare System

Description

Read this case study to learn how:

- Robin, a valued employee, acquired an e-Discovery collection tool for the Legal Department at St. Luke's
- A 154 gigabyte email data set had been collected from Enterprise Vault archives, Exchange Archive, and Exchange Archive email on 18 computers
- The large 154 gigabyte data set was reduced by 97%— including only relevant and pertinent information
