

Stroock Provides Invaluable E-Discovery Support to Clients

Description

(Murray, Nebraska) JUNE 14, 2016

Stroock & Stroock & Lavan LLP, a 140-year-old, commercial transaction and litigation firm deftly leads clients through the maze of e-Discovery requirements by using effective project- management methodologies, top-of-the-line software, along with a highly skilled and trained staff.

Mike Quartararo, the Director of Litigation Support Services at Stroock, needed a robust tool that ran locally from a USB flash drive for targeted single-custodian collections and via a USB hard drive for targeted large network collections. Mike was immediately captivated by Pinpoint Labs's Harvester at a product demonstration in 2012 at the University of Florida. Upon returning, he introduced it to his team and has been using the software utility ever since.

This case study highlights Stroock & Stroock & Lavan LLP's history, Mike Quartararo's contributions, and eDiscovery data collection success using Pinpoint Labs's Harvester.

"We've used it for one custodian and for 30 custodians. There aren't any limitations. Apart from capability, the savings are tremendous. By purchasing individual licenses to collect hundreds of gigabytes of data versus paying a professional hourly, it allows for superb cost savings that clients depend on." -Mike Quartararo, Director of Litigation Support Services, Stroock & Stroock & Lavan LLP
