

The Oliver Group Uses SharePoint Collector to Identify 3,882 Relevant Records out of more than 650,000,000

## Description

Read this case study to learn how:

- The Oliver Group extracted 650,000,000 documents from a SharePoint environment at a Fortune 500 healthcare provider
- Dramatically reduced the original data set to only 3,882 documents
- Preserved metadata for each document from the 21 custodians
